

Before you can get started working with your ARCHICAD content in the Unreal Engine, you need to install the Datasmith Exporter Add-On for ARCHICAD 23.

We encourage you to share the download link to the Datasmith Exporter Add-On with any number of people, both inside and outside of your organization. Please note, however, that you are not permitted to distribute the Datasmith Exporter Add-On itself.

Installing the Datasmith Exporter for ARCHICAD 23

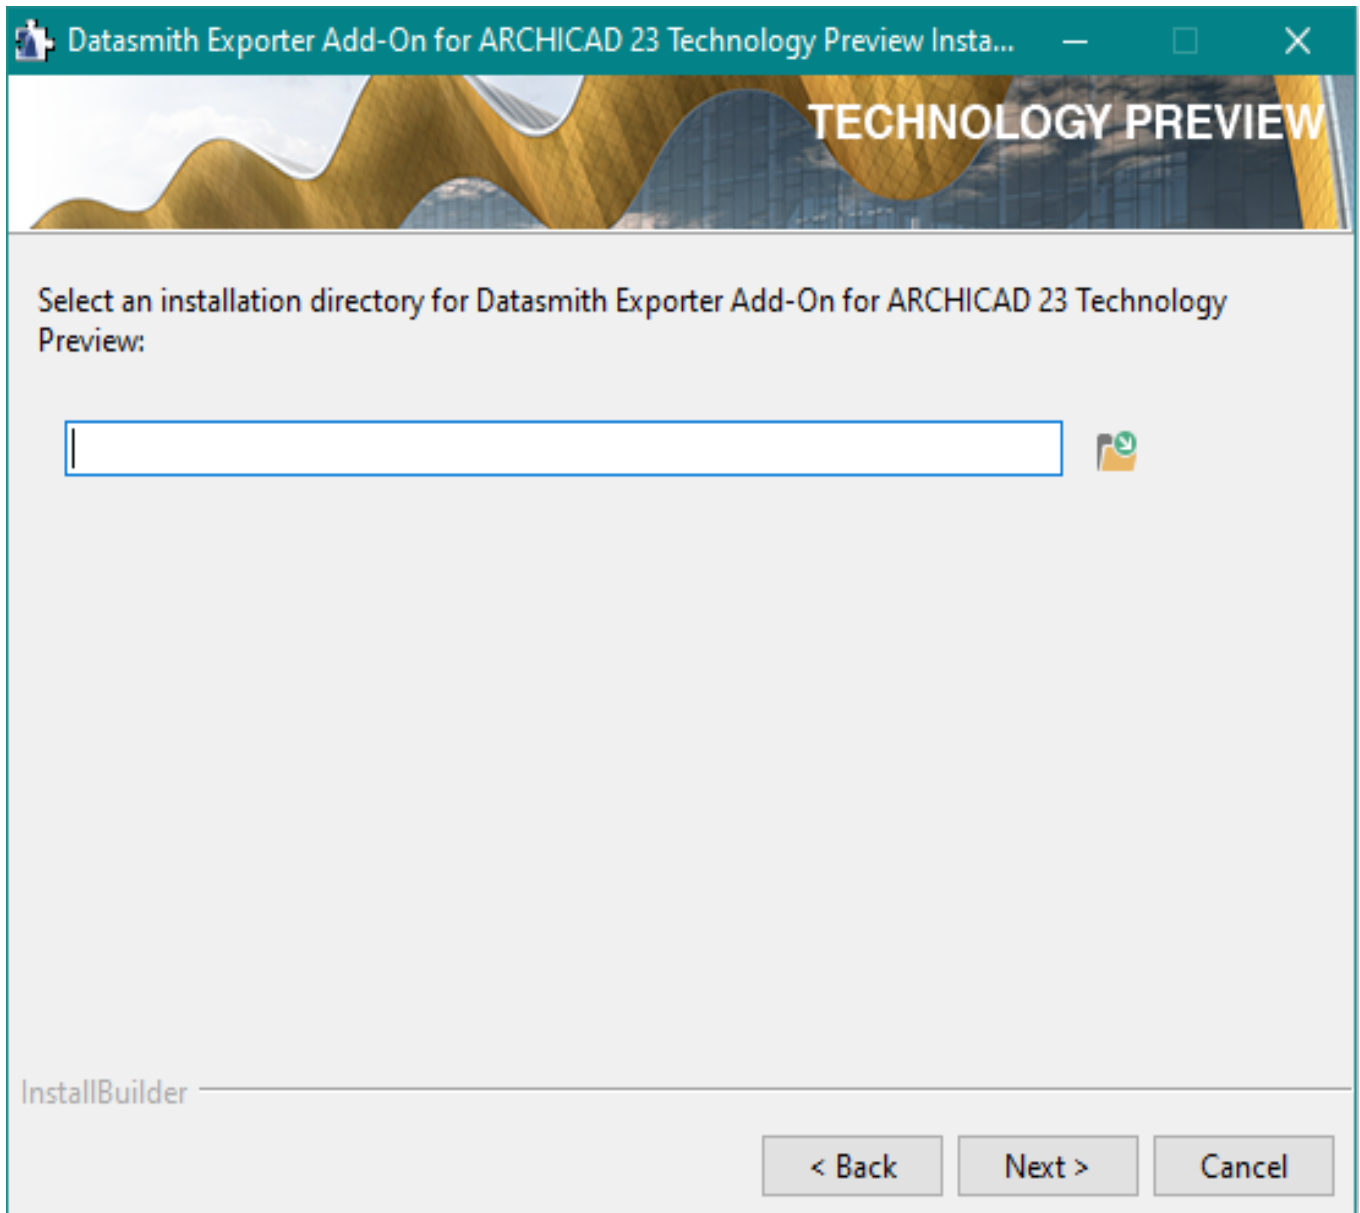

Follow the steps below to install the Datasmith Exporter Add-On for any supported version of ARCHICAD that you have installed on your computer.

1. Close any instances of ARCHICAD that are running on your machine. If any instances are still running, the installation will fail.
2. If you have already installed an older version of the Datasmith Exporter Add-On, we recommend uninstalling it first. For details, see below.
3. Download the Exporter Add-On installer from the Datasmith Exporter Add-On download page.
4. When the download has completed, run the installer.

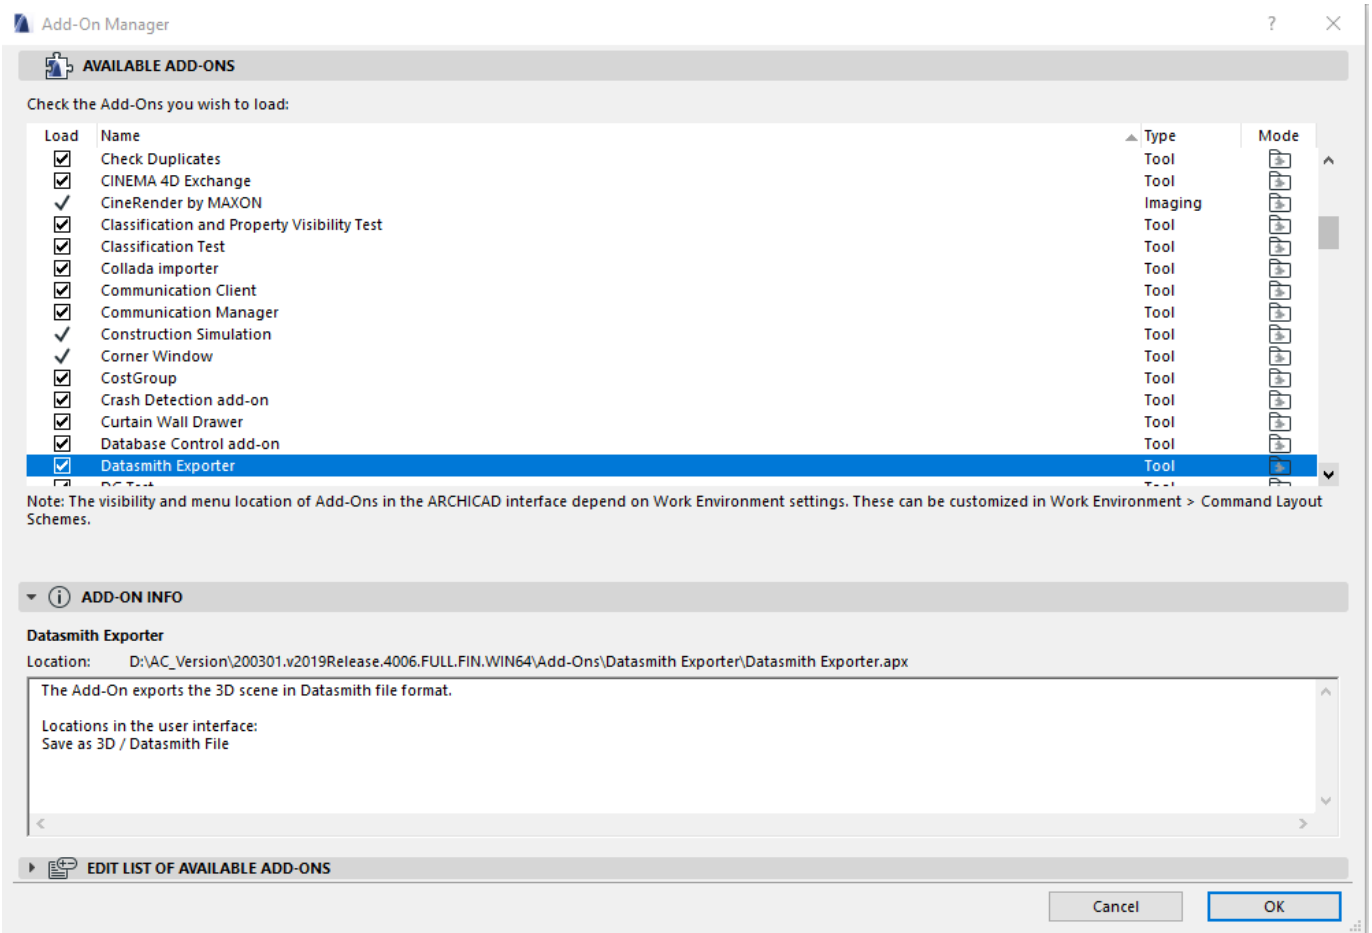

5. Follow the on-screen prompts to continue, and accept the license agreement.

6. Select the directory where you have installed ARCHICAD. The installer might automatically detect the versions installed on your system. Click on Next, Install then Finish.

7. Launch ARCHICAD. Now you should see the Add-On in the Add-On Manager:

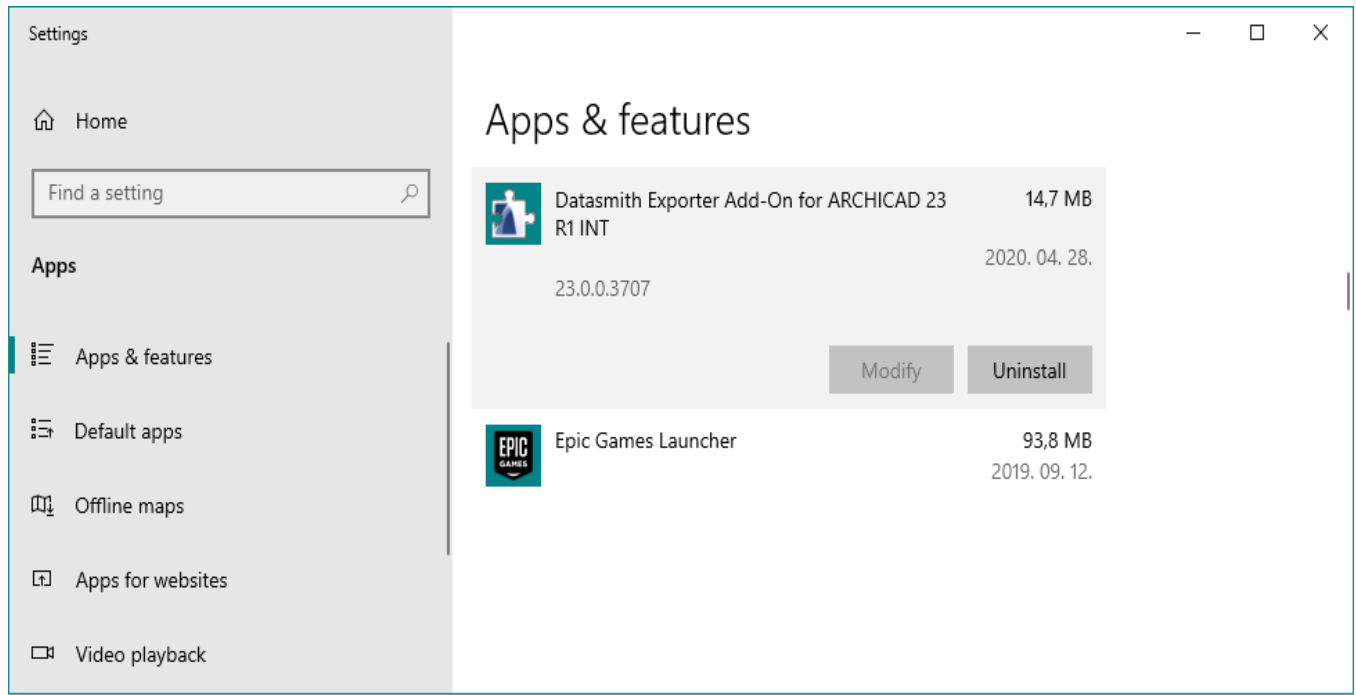

End Result

Now that you have the Datasmith Exporter Add-On installed, you can move on to export a scene from ARCHICAD as a .udatasmith file.

Removing the Datasmith Exporter for ARCHICAD 23

Use the standard Windows control panel utilities to find and remove the **Datasmith Exporter Add-On for ARCHICAD 23** application from your system.

For example, on Windows 10, you can use the **Apps & features** control panel. Click the entry for your Datasmith Exporter Add-On in the list, then click **Uninstall**:

Or, use the **Uninstall or change a program** control panel. Right-click the entry for your Datasmith exporter Add-On, and choose Uninstall from the contextual menu:
